(Taoyaka Program Social Implementation Course)

Date : **Friday, 27<sup>th</sup> March**

Time : 13:30~15:00

Venue : IDEC 201 / Online

Language : English

## Summary

Solid waste management is a challenge many cities in developing countries face today. India poses unique situation in the municipal solid waste as an example of urbanized and emerging economy. This workshop introduces 3 initiatives taken in modern Indian cities. Our focus will be (1) citizens' participation and role of NGOs, (2) application of innovative technologies and entrepreneurship, and (3) the role of private sector and civil society. We will discuss the challenges and proposed solutions from these examples and propose our ways forward.
